Operational consulting

*Engineering and support « on demand »,
all along your project or on a specific step*

- ◆ Project management (including external stakeholders).
- ◆ Definition or review of user requirements, applicable standards.
- ◆ Investigation on concepts, evaluation of technical options.
- ◆ Formalization of system architecture, detailed specifications (Hw & Sw), and all necessary design documentation (Design History File).
- ◆ Qualification support for conformity to standards and EC regulation, including interface with the testing laboratories.

Full design contractor

In partnership with « **Evolution Medtec** » (design company specialized in Elec & Mech Hardware, Embedded software, Optic), we concretize your idea or concept to bring it together into production.
