

GD Biotech

AGRI-AGRO SOLUTIONS

Agro-PLEX Save time, costs and biological material

GD Biotech designs and produces multiplexed ELISA kits.

Multiplexing allows you to test for dozens of markers in a single well.

Targeted applications :

- Product quality control
- Differential diagnosis
- Collection of fine phenotypes

Agro-BIOTE A pipeline to decrypt microbiota

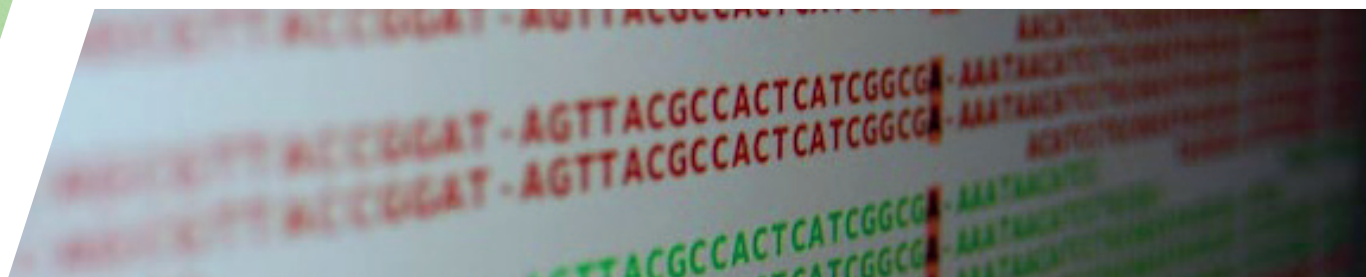

GD Biotech provides a unique know-how integrating all aspects of microbiota analysis. From sampling, to statistical association analyses and the production of high throughput sequences. GD Biotech supports you in the study of microbial communities.

Agro-SENSE Give a concrete biological perspective to your reads

GD Biotech develops innovative bioinformatic solutions for the automation of your DNA sequence analysis.

As the access to the sequencing machine is not limiting anymore, our team focuses on making biological and industrial sense with your DNA sequences.

Agro-PCR Molecular engineering from probe design to commercial kit

The qPCR for all. From probe design to performances optimization and integration of ready-to-use solutions, GD Biotech is your partner for molecular diagnosis applications.
